Structure made of a circular metal base coated with epoxy powders for wall mounting and a metal bend in epoxy powders coating or in two-tone leather. The light diffuses through a Ø16 cm double-wall borosilicate spherical glass diffuser. Integrated dimmer on cable.

ABOUT

Collection of lamps inspired by the classic Chinese lanterns. The particular bi-dimensional structure is made by powder coated painted metal on the outside, while the inside color is sand gray. A new version in a twocoloured leather has enriched the collection. The light source is located inside a doubleside borosilicate glass diffuser, while the suspensions have an additional integrated LED light source in order to create a direct illumination downwards.
